CYBER TRANSITION & TRANSFORMATION LEADER

GRC, RESILIENCE, OPERATIONS - EMEA / GLOBAL

SUMMARY

Trebor's career is a unique blend of **developing cutting-edge technologies**, **C-level management** with international experience and **operational team leading skills**. His journey spans working with both emerging technology startups and Fortune500 companies. **He excels at bridging the gap between technical teams and executive leadership to align Cyber & AI with business objectives.**

He has a **proven track record** in creating and delivering complex projects across various industries, including **energy, aerospace, and IT**. In addition to his corporate experience, Trebor has successfully co-founded and grown startups, focusing on innovative solutions for Urban Air Mobility and AI/IoT for drone.

Trebor excels at Reducing risk exposure through prioritisation model (BIA/criticality × exposure × exploitability) and closure rate tracking. His diverse career showcases his **ability to delivering solutions** that drive industry innovation and security with a positive impact. Trebor applies a hands-on leadership approach, **building strong relationships across teams and functions** to ensure effective knowledge sharing and sound people management.

SKILLS

BUSINESS DEVELOPMENT

- Translate technologies for C-Suites & Boards
- Process architecture improvement & Operating Models
- RACI & KPIs enforcement & Dashboards
- Technologies: Cyber, AI, IT/OT, IoT, Cloud, Robotics, Drones
- Business Unit & Client's Team support
- Digital: GVM (NopSec), e-GRC (Archer Risk Management), Qualys, Tanium, ECG Protect, EAM (Maximo, SAP PM), IAM/PAM (Wallix)
- Standards: ISO27001, SOC2, NIS-2, GDPR, DORA, EU AI Act, MiCA, Green-IT(GHG).

BUSINESS ADMINISTRATION

- GRC supervision & Cyber-IT Interfacing
- K&Sengrev Clients Relations & contract negotiation
- Board Advisory Transformation Services
- Risk & Crisis Management
- Operational Team motivation & cohesion
- Budget, and P&L responsibility

- JV & Startup Creation & Management

EDUCATION -TRAINING

- Member French Cyber Federation (**FF Cyber**)
- **CISM ISACA** Certification (2024)
- **Sengrev Responsible AI** Badge (2023-2024)
- Drone Pilot (RPAS-DGAC) (2019)
- UN Kyoto Protocol (JI-AT) training (2010)
- HEC Challenge + MBA eq. (1993-1994)
- IPSA Aeronautic Engineering (1991-1993)
- Airplane Private Pilot (TT/PPL-A) (1989)
- Languages: French, English

WORKING EXPERIENCE HIGHLIGHTS

FZ / Fornst & Zoung - EMEA - 2022-2025

Deputy Global Director, IT Security & Business Continuity

- Led a 300-member international team supporting operations for 400,000 employees worldwide.
- Oversaw the reorganization and digital transformation of the Governance, Risk & Compliance (GRC) department.
- Defined TOM, RACI and governance cadence across regions; implemented KPI dashboards and service acceptance criteria.
- Improved SLA performance from 35% to 99%
- Executed transition/offshoring programme: scope, runbooks, KT, acceptance, hypercare, steady-state handover
- Implemented AI-driven processes across security operations.
- Participated in the management of a USD 400 million budget within a USD 40 billion group.

Novi Aero - UK, France, Lithuania, Germany - 2014-2021

Co-Founder & Chief Executive Officer - Drones & Aero-IoT

- Established and led a EU consortium of five SMEs (129 FTEs).
- Oversaw financing, budgeting, HR, and shareholder relations.
- Directed R&D in heavy-lift drones and electric aviation.
- Secured over €3 million in funding.

FSN - France, Spain, Italy - 2007-2014

Director, Energy & Climate Change Practice

- Built the Energy & Climate Change department in France and expanded it to Spain and Italy.
- Managed a team of 50 professionals (internal & external).
- Delivered ESG and CSR reporting for CAC 40 clients.
- Contributed to ERM's 80% growth from 2,7k to 5k employees.

Litnergija UAB - Joint Venture - Baltic States - 2003-2007

Managing Partner - ESG & Energy Consulting

- Supervised a team of 15 FTEs providing technical and financial feasibility studies for Dalkia (cogeneration, renewable energy, district heating).
- Developed institutional partnerships (ADEME) and territorial projects in the bio-energy sector.
- Achieved revenue of €1.5 million.

Jola Tech - UK, Lithuania, Canada - 1998-2001

Turnaround CEO - High-Tech & Photonics

- Transformed a failing R&D lab (5 engineers) into a profitable manufacturing company (35 engineers).
- Raised CAD 12 million in funding in Canada.
- Secured IP rights and expanded into strategic markets (laser pump systems - nuclear fusion for Rutherford Laboratory UK).

PROJECTS EXTRACT

TECHNOLOGIES & CYBER SECURITY

ROBERT SENGREV

- . +20 years experience in Tech & Sustainability
- . +12 years expatriation (UK, Russia, Africa...)
- . Fluent in French & English
- . IT / Airspace / Energy / Heavy Industries
- . Business School HEC (MBA eq. / Challenge +)

- **FZ – Restructuring of the Global Infrastructure Services Department**

- Led the transformation and merger of the Governance, Risk & Compliance (GRC), Vulnerability Management, Disaster Recovery, and Business Continuity departments within Sengrev's global infrastructure (400,000 employees, 300 FTEs).
- Reorganized and secured critical operations, improving SLA performance from 35% to 99%. Prepared and implemented the offshoring strategy, including the transfer of 4,000 positions. Participated in managing a global budget of USD 400 million within a USD 40 billion group.

- **Confidential Client - Crisis management:**

- Led a high-impact cyber and governance crisis for a confidential client, following loss of control of a regional entity, ensuring rapid containment and executive-level decision-making.
- Supervised secure data extraction and full decommissioning of local IT infrastructure, in close coordination with Legal, to protect Group assets and eliminate residual risk.
- Oversaw the restoration of a clean operating environment and governance reset for retained employees, ensuring business continuity and compliance.

- **FZ - Ukraine - Data-Room extraction:**

- Co-led Global Outage Management during the early Russia-Ukraine war, directing a 24/7 crisis programme to secure, extract and relocate all critical data and systems from a conflict zone.
- Oversaw the controlled shutdown of all local infrastructure, including secure data transfer of 50+ servers to Germany, full system rebuild, and certified destruction of backup media, despite prolonged power and network outages.
- Provided executive coordination across 300+ contributors (cyber, infrastructure, network, applications, data), restoring secure operations and data access for ~800 employees under extreme conditions.

- **Vilius Energy (Folklo Lithuania) – IBM Mixamo Implementation**

- Implemented IBM Maximo for Dalkia's maintenance of the Vilnius district heating network
- Digitized maintenance processes and established preventive maintenance protocols Serving 600,000 residents.
- Achieved measurable budget optimization and improved service quality and performance indicators (SLA).

- **Novi Aerospace – European Electric Aviation Consortium**

- Founded and led a European consortium of five SMEs (France, UK, Germany, Lithuania) dedicated to electric aviation. Developed the first static-thrust electric turbine as part of the Airbus e-Fan program. Designed and industrialized heavy-lift transport drones and turbo-drones for U.S. special forces.
- Managed global security, cyber and flight safety program.
- Raised EUR 3 million in funding and negotiated technology-sharing and commercial partnership agreements.

- **Jola Tech – CEO – High-Tech Turnaround & Strategy**

- Executed the complete turnaround of a pioneering company in full-color 3D holographic printing. Scaled the organization from 5 to 35 engineers and restored profitability.
- Managed international developer Team for computing farming and distributed rendering software development
- Raised CAD 12 million in Canada to finance industrial ramp-up. Secured intellectual property and developed strategic markets (pump lasers for nuclear fusion – Rutherford Laboratory, UK).
